Chairman Emery, of the tariff board, made a plea for a reasonable and conciliatory discussion of imposts, and heartly welcomed the promises made by other speakers to the effect that the woolen manufacturers would be delighted to furnish the board or any other legitimate investigators with full statistics and other information on the woolen trade.

William M. Wood was extremely well pleased with the tariff. He said that "schedule K was the greatest document produced by the human mind since the Constitution of the United States was formulated." This was some statement, and it was accepted by the woolen manufacturers present with great enthusiasm. Senator Lodge, of Massachusetts, who makes no effort to be classed as a low-tariff advocate, also made a few remarks advocating the vast benefits of protection.

The other speakers were John W.

tion.

The other speakers were John W. Wood, retiring president of the association; William Whitman, of Boston, and Senator Francis E. Warren, of Wyoming, a practical sheep raiser of many years' tractions.

Wool Second to Sugar.

Senator Warren pointed out that the duties of \$33,000,000 on wools and woolens ast year were second as a source of revenue, sugar leading with \$56,000,000. He was quite severe upon those who advo-cated any revision downward in the wool schedules, denouncing arguments to that effect as "the vindictive, senseless, and continuous onslaught upon Schedule K continuous onslaught upon Schedule K
by those who are ignorant of the facts,
but are able, nevertheless, to poison the
minds of their hearers and readers."

It was also perfectly obvious that the
speakers were not pleased with magazine
and newspaper writers who comment adversely upon the tariff. Mr. Warren paid
his regards to the literary tilters at protection in the following burning words:
"Schedule K stands to-day not higher
in duties on a single item than for the
last twelve or more years, and with
some items slightly lower; and yet the
public is made to believe quite the contrary, thanks to the professional muckrakers and their assistant train of
"would-be' and 'almost' muckrakers.
